

# DW800 intercom Effective group-communication

- ▶ Allows up to 5 people to communicate in a group
- ▶ System can connect via docking station to external audio equipment
- ▶ Push-to-talk function (PTT) as a default
- ▶ Batteries charge faster than they deplete
- ▶ Sound Clarity™ for crystal clear communication between participants

Compatible with any Sennheiser Communications telecom headset, the wireless intercom system lets you move around while interacting with the group.

- ▶ Pre-installation arranges for that slave-units identify automatically the master-unit when powered up
- ▶ Push-to-talk function (PTT) enables the user to speak while pushing the button, whereby releasing mutes the microphone.
- ▶ Reliable wireless system, ideal for small professional groups such as theatre crews, TV studio crews, warehouse employees, etc.
- ▶ "LED-Off" after 60 sec. (all LED's is disabled) allows for use without distraction in dimmed surroundings.
- ▶ Easy color-identification of master- and slave units
- ▶ Key Lock on mobile units to prevent accidental activation
- ▶ Possible extension of the system up to eight users with two intercom systems connected together via twisted cable
